Examiner's Statement of Reasons for Allowance

1. Claims 1-4 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to teach, in combination with the remaining elements as recited in claims 1, 3, and 4:

The present invention is directed to vehicular radio wave receiver provided inside a vehicle that has a panel as a body of the vehicle and a window linked with the panel at an edge of the panel.

Regarding to claim 1, Prior Arts fail to teach a dielectric antenna that has a shape of a pole and receives a signal to send the signal to the to the circuit board, wherein the circuit board is disposed close to the edge of the panel so that the ground pattern closely faces an inner surface of the panel; and the dielectric antenna is axially disposed along the window as extending from a peripheral portion of the circuit board close to the edge of the panel.

Regard to claim 3, Prior Art fails to teach that a vehicular radio wave receiver provided inside a vehicle that has a panel as a body of the vehicle and a window linked with the panel at an edge of the panel which includes a circuit board having a receiving circuit on a first surface of the circuit board and a ground pattern on a second surface that is opposite to the first surface; and a dielectric antenna

Regard to claim 4, Prior Arts fail to teach the dielectric antenna is disposed as extending from a peripheral portion of the circuit board to an outside of the circuit board to an outside of the circuit board in a lateral direction of the circuit board, and the ground pattern of the circuit board is an elongate from extended in a direction opposite to the dielectric antenna so that the dielectric antenna and the ground pattern function as element of a dipole antenna.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Turnbull (US 6431712 B1) teaches an automotive rearview mirror assembly including a helical antenna with a non-circular cross section.

Nguyen et al (US 6538609 B20 teach a vehicle antenna mounting system with DC and RF coupling.
